⌄ **Details**

Overview

In class, you hand-sketched **20 web icons** based on common UI and website needs. Now, you'll **digitally redesign** those icons in Figma, exploring both **Line Style** and **Flat (filled) Style**.

You'll turn your concepts into consistent, pixel-aligned, scalable icons.

Icon Concepts to Redesign

Please digitize the following 20 icons:

- Search
- Home
- Settings
- Favorite / Like
- Upload
- Download
- Trash / Delete
- Notification
- Add / Plus
- Edit
- Travel
- Health
- Finance
- Music
- Education
- Sports
- Food
- Communication
- Weather
- Shopping

Requirements

You must complete the following:

... Two versions per icon → 40 icons total:

- **Line Style** – stroke only, no fill

- **Flat Style** – filled shapes only, no stroke

2. **Size**: Each icon must fit within a **32 × 32 px** frame.

3. **Include your sketch**:

   - **If you hand-drew** icons: take a **clear photo** and paste it into your Figma file.

   - **If you used a tablet (or draw digitally)**: take a **screenshot** of your drawing and paste it into your Figma file.

   - Place it at the side of your workspace for reference.

4. **Submission**:

   - Save a **local copy** of your Figma file.

   - **File name format: FirstName_LastName_Section1(2).fig**

   - Refer to the class recording if you forgot how to save a **local .fig copy**.

Tool & Asset Restriction Notice

This assignment is designed to assess your ability to **think from a user's perspective**—specifically, whether your icon designs can be **clearly perceived and understood** by users in a web interface.

To maintain the integrity of this exercise:

- **AI-generated icons or AI design tools are not permitted.**

- **Figma's built-in icon libraries (or any external icon packs) are not allowed.**

- **Using pre-made icons from any source (including online libraries or templates) is strictly prohibited.** Such usage can be detected through reverse image search and library checks.

You must create your own original icons from scratch based on your hand-drawn sketches. The focus is on your ability to **translate conceptual ideas into visual symbols** that are both functional and user-friendly.

Grading Rubric: Figma Icon Redesign
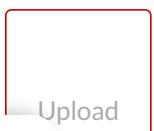

Style Consistency 30pts -- Consistent stroke weight, corner radius, scale, and alignment within each icon set

Visual Clarity & Usability 40pts -- Icons are simple, easy to understand at 32×32px, and follow best icon design practices
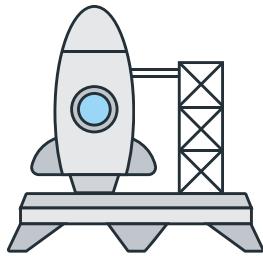

Effort & Creativity 20pts -- Thoughtful, original icon interpretations—not overly generic or copied from libraries

Completion and Documentation 10 pts -- 10 concepts × 2 styles (Line + Flat); all must be present and recognizable. Sketch (photo or screenshot) is clearly included in the Figma file for traceability.
